

We use only the highest-grade materials in our fencing products.

# QUALITY INGREDIENTS

Made in the U.S.A.

- ✓ Built better to last longer with less weathering.
- ✓ Testing and retesting at every step.
- ✓ All products guaranteed in writing.
- ✓ Only the best compounds.

## MADE IN THE USA

We are manufacturing vinyl utilizing only the highest quality micro-ingredients from established US chemical manufacturers.

## HIGH-HEAT STABILIZATION

Quality heat stabilizers help our products withstand UV exposure while preserving the appearance, strength, elasticity and performance of our fence profiles.

## HIGH-GRADE TiO<sub>2</sub>

Our proprietary PVC formula has been designed and tested to have the right amounts of high-grade TiO<sub>2</sub> to fight weathering and keeps colors consistent.

## NON-FERROUS PIGMENTS

Using non-ferrous pigments made by leading manufacturers provides us with consistent color output that resists weathering over time and batch-to-batch consistency

## TOP-QUALITY RESINS

We use only prime-grade resin in our commitment to building only the highest quality products.

## EXCEEDING INDUSTRY STANDARDS

Our fences are manufactured to avoid abnormal peeling, rotting, blistering, rusting, flaking, and corroding. Our exclusive blend of raw materials create fences that exceed industry standards in durability and strength.

## ECO-FRIENDLY

We utilize recycled fence materials lowering the environmental footprint with no impact to durability or quality.

## LESS WEATHERING

Our fences meet or exceed industry established ASTM standards and are continually tested in both laboratory and real-world conditions.
